SACRAMENTO RIVER WATER PROJECT

COOLURIS

In September 2009, the Cities of Woodland and Davis established the Woodland-Davis Clean Water Agency (WDCWA), a joint powers authority, to implement and oversee a regional water supply project designed to replace existing groundwater supplies with surface water supplies from the Sacramento River. Beginning in December 2010, the County Board of Supervisors, WDCWA and the Cities of Woodland and Davis approved a package of agreements with Conaway Ranch to purchase a water intake facility site on the Sacramento River, easements for project facilities, and permanent rights to 10,000 acre-feet of surface water annually (7,500 acre-feet in dry years), starting in 2016. The City of Davis through an agreement with the County supplies water to most Willowbank residents. At our meeting of January 27, 2011 Bob Clarke, Interim Public Works Director/City Engineer for the City of Davis briefed the Committee on the project and its potential impacts on Willowbank residents. Discussion of this matter and Willowbank's options will continue at the April 5 meeting. Included will be a briefing by Dianna Jensen, Water Division Manager for the City of Davis, on the possible supply of groundwater, rather than surface water, to Willowbank.
