The Library will Spin, Pop and Boom!

(Woodland, CA) – The Mary L. Stephens Davis Branch Library is excited to welcome the Mad Science Laboratory on Wednesday, January 9, 3:00 to 3:45 p.m. Children from kindergarten through fifth grade are invited to view experiments in physics and chemistry, ranging from volcanic reactions to spinning centrifugal force. Children will learn to identify physical forces and molecular interactions in everyday activities, and observe chemical reactions that make foam shoot up into the air. Watch as a hand appears to grow, and a swirl of steam like a genie dances out of a bottle!

“Bring the kids to the library on January 9 for some real, hands-on science!” said Yolo County Librarian Patty Wong.

This event is sponsored by the Friends of the Davis Public Library. An American Sign Language interpreter will be on hand. The program is free and will be held in the Activities Room of the Mary L. Stephens Davis Branch Library which is accessible for persons with disabilities. No reservations are required. For more information contact Peggy Rollins at peggy.rollins@yolocounty.org or call (530) 757-5593 #4. For more information on other Yolo County Library programs, visit: www.yolocountylibrary.org.
