

## Organic Product Profile

<b>Applicant/company name</b>	<b>Date</b>	<b>Name of Product Requested for Certification</b>						<b>Percentage of Organic Ingredients<sup>1</sup> _____ %</b>	
<b>Check which labeling category this product.</b> <i>Attach samples of labels for all products for which this Organic Product Profile is used.</i> <input type="checkbox"/> "100% organic" <input type="checkbox"/> "organic" (≥95% organic ingredients) <input type="checkbox"/> "made with organic (ingredients or food group(s)) (≥70% organic ingredients) <input type="checkbox"/> organic ingredients identified only in information panel (<70% organic ingredients)									
<b>Product Composition:</b> Complete the information for all ingredients contained in this product. Although water and salt are not considered when determining the percentage, include information about these ingredients.									
INGREDIENT <sup>2</sup> (INCLUDE ADDITIVES)	CHECK IF INGREDIENT IS CERTIFIED ORGANIC (✓)	SUPPLIER	CERTIFYING AGENT	IF NONORGANIC, CHECK IF INGRED. IS APPROVED? (✓)	HAVE YOU VERIFIED THAT THE INGREDIENT WAS NOT PRODUCED USING ANY OF THE FOLLOWING (✓): EXCLUDED METHODS <sup>3</sup> SEWAGE SLUDGE    IONIZING RADIATION			CHECK IF YOU HAVE DOCUMENTATION THAT NONORGANIC INGREDIENT WAS NOT COMMERCIALY AVAILABLE <sup>4</sup> IN ORGANIC FORM (✓)	% OF FINISHED PRODUCT
<b>Does this product include organic and nonorganic forms of the same ingredient?<sup>5</sup></b>								<input type="checkbox"/> Yes <input type="checkbox"/> No	
If yes, list the specific organic and nonorganic forms of the same ingredient.									
<b>Processing Aids:</b> Provide complete information about all processing aids used in the manufacturing of this product.									
PROCESSING AID	CHECK IF PROCESSING AID IS CERTIFIED ORGANIC (✓)	IF NOT ORGANIC, CHECK IF PROCESSING AID IS APPROVED? (✓)			SUPPLIER	CERTIFYING AGENT			

<sup>1</sup> Calculate the percentage of organic ingredients by dividing the total net weight or volume of combined organic ingredients (excluding water and salt) by the total weight or volume of all ingredients.

<sup>2</sup> All products labeled "100% organic" or "organic" and all ingredients identified as "organic" in an ingredient statement must not be produced using: excluded methods; sewage sludge; ionizing radiation; a processing aid not on the National List; or sulfites, nitrates or nitrites added during the production or handling process (except that wine containing added sulfites may be labeled "made with organic grapes.).

<sup>3</sup> Excluded methods include cell fusion, microencapsulation and macroencapsulation, and recombinant DNA technology, (gene deletion, gene doubling, introducing a foreign gene, and changing the positions of genes when achieved by recombinant DNA technology).

<sup>4</sup> For products labeled as "100% organic" and "organic", handlers are required to source organic ingredients when commercially available. Commercial availability is determined by three factors: appropriate form, quality, or quantity. This is not required for products labeled as "made with...." or products containing <70% organic ingredients.

<sup>5</sup> For products labeled as "100% organic" and "organic", handlers must not use organic and nonorganic forms of the same ingredients. This is not required for products labeled as "made with..." or products containing <70% organic ingredients.
