Healthy Yolo Community Health Status and Community Themes & Strengths Assessments Now Available

(Woodland, CA) – The Yolo County Health Department, through the Healthy Yolo campaign, has completed two additional community health assessments: the Community Health Status Assessment and the Community Themes & Strengths Assessment. The Community Health Status Assessment provides a comprehensive look at the health status and contributing factors within Yolo County. The Community Themes & Strengths Assessment is the result of survey responses asking Yolo County residents to identify health issues that are important to them, their perceptions of the quality of life in their community, and community strengths and assets. The assessment reports are now available at www.HealthyYolo.org.

Healthy Yolo is a long-term systematic effort to improve community health. Since July, Healthy Yolo has been engaging the community to share and together understand the specific health concerns and strengths of the community, prioritize public health issues, and determine goals and strategies to achieve a healthier Yolo County.

Healthy Yolo will compile the assessment results in to an overarching Community Health Assessment which will be made available online. Healthy Yolo will also conduct community forums in the month of April sharing the results of the Community Health Assessment and seeking community input into strategic issues.
