PRACTICE

Practice the plan

Family Emergency Communication Plan

It all starts with "What If?"

Create a paper copy of the contact information for your family and other important people/offices, such as medical facilities, doctors, schools, or service providers

Make sure everyone carries a copy in his/her wallet. Complete your Family Emergency Communication Plan online at ready.gov/make-a-plan. Post a copy on your refrigerator.

Have regular household meetings to review and practice your plan

TEXT IS BEST!

In an emergency, if you are using a mobile phone, a text message may get through when a phone call will not.
