

North Davis Meadows  
County Service Area Advisory Committee #10  
Meeting Minutes  
Davis Municipal Golf Course Dining Area, Davis CA  
May 8, 2012

Present

Advisory Members-Bonnie Wolstoncroft, Kathy Greenhalgh, Antoinette Heberlein, Bill Reinert  
County Staff- Supervisor Don Saylor

1. The meeting was called to order at 7:05pm
2. Everyone present introduced him or herself
3. Approval of Minutes- November 16, 2011
4. Regular Agenda
  - A. North Davis Meadows Water Options- There was a subcommittee review of the 99% Draft of Wood Rodgers Revised Technical Memorandum and Engineer's Report. Discussion of differences between collocation on one well site or having two different well sites. It was agreed that for the 218 purposes the amount that would be used would be the higher amount for 2 wells at 2 different sites. The letter to neighbors from the subcommittee would go out and be out for a week of comments and then we would agree to meet with Wood Rodgers in Subcommittee and discuss any changes needed to the 99% in order to complete the Engineer's Report and Technical Memorandum. The advisory committee will support the Water Subcommittees recommendation. Drilling of two deep wells will be pursued. The 99% Draft submittal will be posted to the website for all interested parties to view.
  - B. Probable 218 timeline was discussed with a public information component to start in the fall of this year, 2012.
  - C. Rick Rowe from Ionex was present to discuss the ion exchange process and working with ACWA Clear to bring forth a new technology that could be a possible 2<sup>nd</sup> alternative to the well drilling alternative. Comments were made that the one way that the system/technology would seem most feasible to the neighborhood would be to design to treat domestic water and separately plumb for irrigation.
5. The next meeting was not scheduled. Thoughts that this could happen in July or water subcommittee could meet and then find a date that would work for all subsequently.
6. Agenda items for the next meeting: 218 Timeline Update, Engineer's Report Update, Ditch Maintenance.
7. Meeting Adjourned.
