

## NOTES

- There can be no cross connection between the existing well water system (to be used for irrigation) and the new potable water supply.
- Piping from a house that serves just a pool will remain as is. If a pool is connected to the house on a pipe that also feeds irrigation, it will be disconnected.

## LEGEND

- New Potable Water Supply
- - - Existing well water supply
- ✗ Disconnection point
- \* Backyard hose-bib (non-potable)
- \* Hose-bib connected to house served with potable water

## Home Connection Example

North Davis Meadows County Service Area Water Improvements
