

Measured Land Subsidence in Yolo County

 Yolo County Boundary
 Line of equal change in ground surface elevation in meters (see notes below)

- Notes (modified from D'Onofrio and Frame, 2003):
- 1) Contours are based on orthometric heights determined from GPS measurements taken in July-August 1999 and in July-August 2002. Values are expressed in meters.
 - 2) Measurement accuracy is estimated to be within +/- 2cm.
 - 3) Stations in the southeastern portion of the county were not observed in 1999. Subsidence information for these stations is based upon 1997 observations.
