Re: Compliance Order CC0001261 for NDM, LPA ID 5700788

On November 7, 2016, Anna Louzon with the County Service Area (CSA) Administrative Support Team at that time, let you know the Corrective Action Plan for these violations was being implemented and in the interim stages with the County finalizing a contract with the engineering firm selected to prepare the technical documentation to connect to the North Davis Meadows CSA to the City of Davis water system, and that the County had begun preparing an application for an State Revolving Fund (SRF) loan for that work. It was expected at the time, that construction would have started in summer of 2017 and be complete by the end of 2017.

The County was on this path, and design near complete in August for a dual-use connection project in which North Davis Meadows residents would be connected to City of Davis water for indoor uses and remain connected to well water for outdoor uses. After review by the City of Davis Fire Chief however, the project was reconsidered as the Fire Chief recommended all uses be connected to the City of Davis water supply to ensure safe drinking water and adequate fire protection. After further review and a survey of residents, the single-use connection was chosen.

Engineering for the single-use connection is near complete with final cost estimates expected in mid-January 2018. Pending successful completion of Proposition 218 proceedings (currently scheduled for March 20, 2017) to repay an SRF loan for the entire project, a final loan application will be submitted to the State. The loan application review is expected to take 6-8 months and construction to take 4 months. It is the County's hope that the residents of North Davis Meadows will be connected to City of Davis water by April of 2019.

Should you need additional detail about the project or timeline, please let me know. Residents of North Davis Meadows CSA are regularly kept informed of the project, timeline and current water quality via www.YoloCounty.org/North-Davis-Meadows-CSA.

Best regards,

Beth Gabor
Yolo County Manager of Operations & Strategy
