2019 Novel Coronavirus (COVID-19)

Yolo County Health Advisory and Interim Guidance – **UPDATED**

Date: March 3, 2020

Situation Update:

The California Department of Public Health (CDPH) announced that 16 laboratories, including California's Viral and Rickettsial Disease Laboratory in Richmond, California can perform testing for novel coronavirus. California has received additional testing kits. However, testing is still only available for those who meet clinical and/or epidemiologic risk criteria and is a person under investigation (PUI). There is NO widespread general testing of the public who do not meet criteria. Please continue to follow standard viral respiratory illness screening and practices, including respiratory viral panels and influenza testing.

Suspect COVID-19 patients are those with:

- fever or signs/symptoms of respiratory illness and a history in the prior 14 days of contact with a laboratory-confirmed COVID-19 case or travel to an affected country or area per the latest CDC recommendations, or
- fever or signs/symptoms of severe respiratory illness that requires hospitalization without alternative explanatory diagnosis (no source of exposure identified)

If your facility suspects COVID-19 infection, please refer to the CDPH Outpatient Healthcare Facility Infection Control Recommendations for Suspect COVID-19 Patients (PDF)

<https://www.cdph.ca.gov/Programs/CHCQ/LCP/CDPH%20Document%20Library/AFL-20-15-Attachment-01.pdf>

Recommendations and guidelines are subject to change as additional information becomes available.

Contact Yolo County by Phone 24/7 to discuss patients in Yolo County meeting CDC criteria to rule out or test for the novel coronavirus (COVID-19):
