Yolo County is Vaccinating Seniors 75+

WHO

Starting February 2021, Yolo County will be vaccinating residents 75+ because they are the most vulnerable out of those who are 65+. The County will first focus on the most underserved areas based on socio-economic vulnerability.

WHY

A COVID-19 vaccine given to someone 75 and older is **3 times more likely** to save a life than a vaccine given to someone 65-74. The limited doses the County's received must be focused on saving lives. The County will broaden to 65+ once more doses are available.

HOW

If you have insurance through Dignity, Kaiser, Sutter, or UC Davis, please contact your healthcare provider first for COVID-19 vaccine options.

If you don't have health insurance or receive care from a community clinic like CommuniCare, Elica, or Winters Healthcare, fill out the County's COVID-19 vaccine form at: **http://bit.ly/VaccineAvailability** or **scan the QR code**.

If you can't access or need assistance filling out the online form or are homebound and need an in-home vaccine, call **2-1-1** or toll free at **(855) 866-1783** for assistance.
