FINAL PARCEL OR SUBDIVISION MAP APPLICATION REQUIRED MATERIALS

The following list specifies the information needed to submit the proposed application.

ITEM	RECEIVED
Application Fee(s): Please check with a planner regarding applicable fees	
Application Form (both sides, signed)	
Sets of prints of the Final Map on 24" by 36" (see attached Requirements for a Final Subdivision Map or Parcel Map)	
Copy of closure traverses of subdivision boundary, blocks, parcels, including areas, and street centerlines, all based upon a single coordinate system	
If required by the Conditions of Approval, Final Improvement Plans (see attached Requirements for Improvement Plans)	
If required by the Conditions of Approval, Subdivision Improvement Agreement	
Copy of the Conditions of Approval and Mitigation Measures and a statement from the applicant indicating that all conditions have been met, with all appropriate documentation submitted with this application	
If required by the Conditions of Approval, Improvement Bonds	
Preliminary Title Report or Copy of Deed	
Digital files of all the application materials, as described above	
Additional Information: Depending upon the exact nature of the application, additional information may be required after submittal of the project application.

PERMIT PROCESSING FEE AGREEMENT

I, the undersigned, hereby authorize the County of Yolo to process the permit request on the previous side of this application in accordance with the Yolo County Code. I (the land owner and/or the applicant) am depositing a minimum initial deposit to cover staff review, coordination, and processing costs related to my application request based on actual staff time expended and other direct costs, including, but not limited to, outside consultant services, county counsel charges, and materials costs in accordance with the adopted Yolo County Fee Resolution and the Project Cost Reimbursement Agreement attached to this application, if required. This initial deposit will be held by the County in a deposit account to pay for staff time and other charges spent processing the application. I understand that such costs will be drawn from the deposit account and that I will be billed on a "time and materials" basis in order to maintain a positive account balance at all times during the review process. I further understand that no work will be performed on the project with a negative fund balance. By signing below, I agree to pay all permitting costs, including requests to supplement the deposit account, plus any accrued interest, if the applicant does not pay costs.

I agree not to alter the physical condition of the property during the processing of this application by removing trees, demolishing structures, altering streams, and grading or filling. I agree not to start construction of any new structures prior to permit approval. I understand that such alteration or new construction may result in the imposition of criminal, civil or administrative fines or penalties, or may result in the delay or denial of the project application.

FISH AND GAME REVIEW FEES: I understand that my application and/or any applicable environmental document for my project may be referred to the California Department of Fish and Wildlife (CDFW) for review and comment in accordance with the provisions of the California Environmental Quality Act. Should this review be required, I understand that I must pay all fees for the cost of CDFW review as required by Section 711.4 of the Fish and Game Code (currently \$2,480.25 for Negative Declarations or \$3,445.25 for Environmental Impact Reports, plus \$50.00 County Clerk fee). Should these fees be required, I agree to remit a cashier's check or money order in the required amount, payable to the Yolo County Clerk, to the Planning Division prior to the posting of any Notice of Determination following project approval.

MITIGATION FEES OR REQUIREMENTS: I further understand that my project, if approved, may be subject to one or more mitigation fees including the following fees current as of 2020:

Yolo HCP/NCCP land cover fee*: \$14,950 per acre of impact to all applicable land cover types

Yolo HCP/NCCP fresh emergent wetland fee*: \$76,042 per acre of impact to fresh emergent wetland areas

Yolo HCP/NCCP valley foothill riparian fee*: \$84,217 per acre of impact to valley foothill riparian areas

Yolo HCP/NCCP lacustrine and riverine fee*: \$60,986 per acre of impact to lacustrine or riverine areas

Agricultural mitigation in lieu fee: \$10,100 per acre of farmland converted (for projects less than 20 acres)

Inclusionary Housing in lieu fee: sliding scale for projects under 8/10 units (\$1,292 for single family house)

**Fee amounts subject to change in March of each year per the conditions outlined in the Yolo HCP/NCCP*

AFFIDAVIT OF CERTIFIED PROPERTY OWNERS

I further certify that the attached list of property owners contains the names and addresses of all persons to whom all property is assessed as they appear on the latest available assessment roll of the County within the area described on the attached application and for a distance of three hundred feet (300) from the exterior boundaries of the property described on the attached application.

I certify under penalty of perjury that the foregoing is true and correct.

CERTIFICATION STATEMENT OF HAZARDOUS WASTE OR SUBSTANCE SITE

Pursuant to the requirements of Section 65962.5 of the California Government Code, I certify that the project site for the above entitlement is not located on the State list of identified hazardous waste/or hazardous substance sites.

REQUIRED SIGNATURES

I hereby certify that I have read all the above information on this page. All this information is correct and I agree to abide by the requirements therein.

INDEMNIFICATION AGREEMENT

As part of this application, applicant and real party in interest if different, agree to defend, indemnify, hold harmless, and release Yolo County, its agents, officers, attorneys, and employees from any claim, action, or proceeding brought against any of them, the purpose of which is to attack, set aside, void, or annul the approval of this application or adoption of the environmental document, which accompanies it. This indemnification obligation shall include but not be limited to: damages, costs, expenses, attorney fees, or expert witness fees that may be asserted by any person or entity, including the applicant, arising out of or in connection with the approval of this application, whether or not there is concurrent passive negligence on the part of Yolo County, its agents, officers, attorneys, or employees.

Project Cost Reimbursement Agreement

I, _____, the undersigned, hereby authorize the County of Yolo to process permit request ZF _____ in accordance with the Yolo County Code. I am depositing \$ _____ as an **initial deposit** to pay for County staff review, coordination, and processing costs related to my application request based on actual staff time expended and other costs, including, but not limited to, costs for outside consultants' services, legal review, and materials and equipment.

In making this initial deposit, I acknowledge and understand that the initial deposit may only cover a portion of the total processing costs and additional deposits may be required to cover the total processing costs. Actual costs for staff time are based on hourly rates adopted by the Board of Supervisors in the most current Yolo County master fee schedule and include allowable direct and indirect costs. Actual Costs may also include other costs, such as consultant costs. I also understand and agree that I am responsible for paying these costs even if the application is withdrawn, not approved, or appealed.

I understand and agree to the following terms and conditions of this Reimbursement Agreement:

1. Time spent by Yolo County staff in processing my application and any outside costs will be billed against the available deposit. **"Staff time" includes, but is not limited to, time spent reviewing application materials, site visits, responding by phone or correspondence to inquiries from the applicant, the applicant's representatives, neighbors and/or interested parties, attendance and participation at meetings and public hearings, preparation of staff reports and other correspondence, processing of any appeals, responding to public records act requests or responding to any legal challenges related to the application. "Staff" includes any employee of the Department of Community Services and/or the Office of the**

County Counsel. Other costs may include outside services used, such as consultant charges. This agreement does not include other agency review fees or the County Clerk Environmental Document filing fees, Agricultural/Habitat Mitigation fees, or fees collected by other divisions that may charge separately for their review (such as Building permit fees and Environmental Health fees) or other required flat rate fees and charges.

2. I agree to pay all costs related to permit condition compliance as specified in any conditions of approval for my permit/entitlement.
3. I understand that approval of my application may result in additional fees including, but not limited to, Yolo Habitat Conservancy mitigation fees, Yolo Agricultural Conservation and Mitigation Program fees, filing fees, and other County permit application fees.
4. Staff will review the application for completeness and provide me with a good faith estimate of the full cost of processing the permit. The good faith estimate is not a guarantee of maximum costs.
5. I will receive monthly statements showing the costs applied, and the available balance. I will be asked to replenish the deposit as needed to maintain a positive balance.
6. I understand that the County desires to avoid incurring permit processing costs without having sufficient funds on deposit. If staff determines that inadequate funds are on deposit for continued processing (usually less than 20% of the initial deposit), staff will notify me in writing and request an additional deposit amount estimated necessary to complete processing of my application, no less than 50% of the original deposit. I agree to submit sufficient funds as requested by staff to process the project through the hearing process within 30 days of the request.
7. If the final cost is less than any additional deposits requested by the County and funds remain on deposit, the unused portion of the additional deposit will be refunded to me within approximately 90 days of final project action.
8. If the final cost is more than the available deposit, I agree to pay the difference within 30 days of final project action or prior to ground disturbance and/or building permit issuance.

9. I understand, if I fail to pay any invoices or requests for additional deposits within 30 days, the County may either stop processing my permit application, consider my application withdrawn, or after conducting a hearing, deny my permit application. If I fail to pay any invoices after my application is approved, I understand that my permit may not vest and may expire, or may be subject to revocation.

10. I agree to pay for any County consultant costs related to my application. If the County determines that any study submitted by the applicant requires a County-contracted consultant peer review, I will pay the actual cost of the consultant review. These costs may vary depending on the complexity of the analysis. Selection of any consultant shall be at the sole discretion of the Yolo County Department of Community Services. The estimated cost shall be paid prior to the County initiating any work by the consultant.

11. I agree to pay the actual cost of any public notices or filing fees for the project as required by State law and local ordinance.

12. I understand that if I fail to pay costs that I will be charged late fees, interest and collection costs. I furthermore agree to pay any late charges, interest and collection costs accrued as a result.

PROJECT APPROVAL PROCESS

A Final Subdivision or Parcel Map is presented to the County Board of Supervisors for approval when:

- The Final Map is in substantial conformance with the Tentative Map.
- The Planning and Public Works Divisions have verified that all Conditions of Approval and Mitigation Measures related to the map have been satisfied.
- Improvement Plans and all accompanying items are acceptable to the County Engineer and plans are ready for County Engineer approval.
- Final Improvement Plans are submitted to the Department on 24" x 36" polyester film sheets (Mylar®, or equivalent) with matte finish and original signatures are in all signature blocks.
- The Final Map is approved by the County Surveyor as technically correct.
- The Final Map is approved by the County Engineer for compliance with the approved tentative map, Subdivision Map Act, and local ordinances.
- Adequate, signed Improvement Bonds have been submitted to the County (100% Performance Bond and 100% Labor & Materials Payment bond).
- A Subdivision Improvement Agreement has been approved by County Counsel and has been signed by the applicant/developer (per Yolo County Code Title 8, Section 8-1.904).

REQUIREMENTS FOR A FINAL PARCEL OR SUBDIVISION MAP

All Final Parcel or Subdivision Maps shall conform with the requirements set forth by the State of California Subdivision Map Act, the Yolo County Land Development Regulations (Chapter I, Title 8 of the Yolo County Code), and those Improvement Standards set forth by Yolo County Public Works. In addition the map shall conform with the following criteria and show the following information:

Map Preparation:

- Prepared by or under the direction of a California Licensed Land Surveyor, or Registered Civil Engineer.
- Shall be based upon a field survey.

Map - Form and Content (as required by Yolo County Code Title 8, Chapter 1, Article 5 and Article 9):

- Legibly drawn, printed or reproduced on polyester based material meeting reproduction requirements of the Subdivision Map Act.
- Each sheet shall measure 18 inches by 26 inches, and provide a one-inch blank margin and margin line around the entire perimeter.
- All drawings, affidavits, acknowledgements, endorsements, acceptances and seals shall be located within margin line.
- Each sheet shall be numbered with the number of the sheet, and total number of the sheets, in lower right hand corner on each sheet.
- Each sheet shall contain a title, with subdivision number and name, and show the definite location of the subdivision, and particularly its relation to surrounding surveys. The words "County of Yolo" shall appear in the title.
- All statements and seals as required by Subdivision Map Act, and local ordinance.
- North arrow, scale, date of survey, legend, and notes. Engineer's scale of one inch to 100 feet, or less.
- Basis of bearings for survey shall be based on the California State Plane Coordinate System, Zone 2 (North American Datum 1983).
- Distances shall be shown as ground, in feet and decimals thereof.
- All dimensions, bearings, and curve data necessary to locate monuments and retrace all interior and exterior boundary lines, including bearings, distances, radii, arc length, chord bearings, length and central angle of all curves, ties to monuments to establish boundaries of subdivision, streets, and lots.
- Each parcel numbered (or lettered if proposed to be used for utility or other special purpose), and each block numbered.
- Each public street named.
- All easements shown.
- Right of ways of adjacent streets shown and ties to the centerline of such intersecting streets.
- All monuments, found, set, or reset, describing their kind, size, and location.
- City or County boundary lines.

REQUIREMENTS FOR IMPROVEMENT PLANS

Following approval of a Tentative Subdivision Map or a Tentative Parcel Map, and prior to the submission of any Final Subdivision or Parcel Map (if required by the Conditions of Approval) for review, the subdivider/developer shall prepare and submit complete on-site and off-site Improvement Plans and accompanying items in one submittal. When improvements are required, the approval of Improvement Plans by the Assistant Director, Public Works (County Engineer) is a prerequisite to the presentation of the Final Subdivision (or Parcel) Map to the Board of Supervisors for approval.

In the case of site development only, Improvement Plan approval by the County Engineer shall be a prerequisite to issuance of a Building Permit.

Construction shall not begin on any portion of the improvements prior to Board of Supervisors approval of the Map, execution of the Subdivision Improvement Agreement and posting of the Improvement Bonds (if required by the Conditions of Approval), and at least two business days advance notification to the County Public Works Division.

Improvement Plans –Preparation:

- The Improvement Plans shall be prepared by, or under, the direction of a California licensed civil engineer.
- The approval of Improvement Plans by districts supplying water and/or sewer services, and the approval of plans by agencies having jurisdiction over other portions of the work (i.e. Caltrans, Yolo County Flood Control and Irrigation District, Reclamation Districts, etc.), shall be obtained prior to County plan approval. Obtaining such approvals is the responsibility of the developer.
- All plans shall be prepared using computer-based design and drafting software. Improvement Plans shall be prepared using AutoCAD (version determined by County). Electronic files of plans and supporting documentation shall be submitted to the Department prior to approval of Improvement Plans.

Improvement Plans –Form and Content:

- Plans and profiles shall be submitted on uniform size sheets measuring 24 by 36 inches in overall dimension.
- Plans shall be drawn to professional drafting standards and to appropriate scales to clearly show intent without crowding or possibility of misinterpretation. All plans, lettering, and details shall be drafted at sufficient scale to permit full legibility when reduced to one-half original drawing size.
- All engineering plans and reports submitted for review shall be clearly stamped 'preliminary' or 'draft', and shall be dated to reflect the submittal date.
- The border and title block shall be as shown in the County Improvement Standards.
- Signature blocks for County and water or sewer district approval shall be provided, as described in the County Improvement Standards.
- The engineering scales for various portions of the drawings and the north point, where applicable, shall be shown on all sheets.
- Referenced County standard details shall be drawn on the improvement plans.
- If the plans include four or more 'plan and profile' sheets, a key map shall be included in the plans. The key map shall be at one inch equals 300 feet or one inch equals 600 feet scale, and show streets and street names, lots and lot numbers, and the area thereof covered by each sheet of the plans.
- Plans shall show complete on-site and off-site plans, profiles, and details for all street work, storm drainage and detention systems, sanitary sewer systems, water supply and distribution systems, including valves and fire hydrants, storm drainage conduits, inlets, channels, and structures; retaining walls, earthworks, bridges, and location of underground and aerial utilities, appurtenances, and

structures which may affect, or be affected by, the horizontal and vertical location of other facilities; survey monuments, curbs, gutters, sidewalks, signage, striping, landscaping; fences, gates, and driveways, and paths in conjunction with subdivision improvements; and any and all other improvements which may be required to complete the work and coordinate the process of construction.

- The County may require that the plans include cross-sections at intervals, on-site or off-site locations, and to a scale specified by the County, to accurately show original ground and finished grades throughout the full width of the improvement area and beyond as may be deemed necessary.
- All storm drainage, sanitary sewer, water, and street systems shall be designed and sized to accommodate such additional flows, volumes, or loads as may be distributed by the existing or future development of lands adjacent to or beyond the limits of the subdivision or site development.
- At the time of submittal for checking, plans shall be accompanied by a complete estimate for all on-site and off-site public improvements, engineering calculations for storm drainage and sanitary sewerage systems, water systems, and for any other facilities or structures deemed necessary by the County Engineer to evaluate and check the improvement plans. Said estimate shall bear the signature and seal of the engineer who personally prepared and supervised the preparation thereof.

Improvement Plan Submittal - Accompanying Items:

- Submit copy of all rights of entry required from private parties.
- Submit a copy of Notice of Intent (NOI) submitted to the Regional Water Quality Control Board, and provide the WDID number and Stormwater Pollution Prevention Plan (SWPP) to the County, to demonstrate compliance with County stormwater ordinance prior to improvement plan approval.
- Submit off-tract offers of dedication, and private easements for review.
- Submit evidence of LAFCO annexations to County Service Areas and Service Districts.
- Submit statement from fire district that district will serve the subdivision.
- Submit statement from the district or agency furnishing the water and sewer services that such district or agency will serve the subdivision. (final improvement plans shall be approved by district.)
- Submit bond guaranteeing special district assessments, if any.
- Submit a statement from Yolo County Public Health Director approving the method of sewage disposal if individual sewage disposal systems are proposed.
- Submit design calculations as required by the County Engineer.
- Submit Engineer's Cost Estimate.
 - All quantities, unit costs, extensions, and assumptions clearly stated.
 - All quantities are correct, no missing items
 - Verify that unit costs compare with current County opinion of costs. Do not use developer bid prices, use the cost to the County if it was to be bid as a public project (since that is what will happen if the County is forced to use the improvement bonds to complete the construction)
 - Grading quantities shown – lump sum not acceptable.
 - Driveways included as separate line item.
 - Sidewalk calculated by the square foot, and not included in curb and gutter item.
 - Increase costs of facilities installed in existing streets by 50%.
 - Check groundwater depth. If pipes are installed below water table, increase cost by \$20 per lineal foot.
 - When resubmitted, verify that all changes in plans are reflected in the estimate.
 - County inspection fees shown.
 - 20% minimum contingency required. Higher if construction cost data suggests escalating cost environment.
 - Include all testing and inspection costs, as well as 10% for construction management, and 15% for administration.
- Submit engineered drainage study to substantiate the proposed drainage system and detention basin design.
 - The hydraulic analysis shall be prepared, signed, and stamped by a California Registered Civil Engineer.
 - Storm calculations must be completed using a dynamic analysis computer program such as SWMM for basin and storm pipe analysis. (Not modified excel spreadsheets with own formulas, or rational method based analysis.)

- Tributary area map shall be large enough to be legible and must include: the size in acres for each drainage area (DA) and related drainage information including the catch basin and manhole numbers and locations, corresponding to the drainage analysis sheet; rim/top of curb, and invert of all structures; pipe information (length, size, type, and slope of all pipes). This information shall correspond directly with the respective structures on the improvement plans.
 - Hydraulic Grade Lines (HGL) and Energy Grade Lines (EGL) shall be calculated and shown graphically.
 - Known or assumed downstream water surface elevation or HGL, and basis of the assumptions.
 - Copies of the referenced county standards and rainfall intensity curves, for both pipe size/slope calculations and basin size calculations for each event (on-site 10-year, and basin 100-year storm).
 - A detail for the on-site detention basin showing top, toe, high water and other relevant elevations including dimensions (including required freeboard).
- Submit preliminary soils report. The soils report shall be prepared by a California registered geotechnical engineer, and shall be based upon adequate test borings.
- The developer shall obtain the Chief Building Official's approval of the soils report and submit a statement from the Chief Building Official that the preliminary soils report is acceptable.
- If the preliminary soils report indicates the presence of critically expansive soils or other soil problems, which, if not corrected, could lead to structural defects, a full soils investigation and report for all or any portion of the subdivision may be required. Such soils investigation shall recommend the corrective action, which is likely to prevent structural damage to all structures proposed in the area where such soils and soil-related problems exist.
- The Board may approve the parcel or final map for subdivision, or portion thereof, where such soils problems exist if it finds, upon recommendations of the County Engineer or Chief Building Official, that the recommended action is likely to prevent structural damage to each structure to be constructed and, as a condition of the issuance of any building permit, may require that the approved recommended action be incorporated in the construction of each structure.
 - Where a preliminary soils report, soils report, or geological report has been prepared for a subdivision, the grading plans or development plans, which provide the design for earthwork therefore shall bear the signature of the soils engineer who has performed the investigation, and the as-built plans shall bear his certification that the work was performed in accordance with those plans.
- Submit landscape and irrigation plans.
 - Plans shall be 1" = 40' scale.
 - Shall be submitted when Improvement Plans are submitted.
 - Route to Planning and County Service Area staff for review.
 - Irrigation schematic to be shown separate from planting details, and include head loss calculations for each line.
 - Property/right-of-way lines and planting easements shown.
 - Plants specified by scientific and common names.
 - Street trees conforming to County Improvement Standards.
 - Root barriers shown for trees in landscape strips in County right of way.
 - Drainage provided for.
 - Conflicts with other utilities and public facilities and clearances.
 - Planting easements dedicated.
 - Sleeves under sidewalks for irrigation pipes to landscape strips shown, and matching improvement plans.
- Submit joint utility trench plans showing gas, underground electric, telephone, and cable television utilities.
