Contact Name/Title:	Phone Number:
Email:	

The Yolo County Zoning Code requires septic systems and wells to have a setback to a flood control levee of five hundred (500) feet within the unincorporated areas of Yolo County. This setback can be reduced by the Yolo Co. Planning Division if site specific engineering evidence demonstrates that the proposed work would not jeopardize public health or safety.

**Please attach the following to this application:**

- An accurate scaled Site Map showing all proposed work and identifying the levee toe. (For septic systems, the Qualified Septic Designer shall prepare the site map showing all proposed septic components - tank locations and leach field footprints).
- A signed and stamped site specific engineering report/letter.
- Written concurrences from the following agencies. If a written concurrence is not available, then the engineer shall receive verbal concurrences and include the agencies' contact name, title, and finding in their final report.
  - Central Valley Flood Protection Board (CVFPB)
  - Department of Water Resources (DWR)
  - United States Army Corps of Engineers (USACE)
  - Local Reclamation District (RD)

**I certify that the submitted information and the attached site map are correct, and that I am authorized to file this request. I understand that an hourly rate will be charged for review of this request; the first hour will be paid at the time of request submittal, and any additional hour(s) needed to complete the review will be billed to the owner.**
