Notice of Determination

To: Yolo County Clerk Office of Planning and Research
625 Court Street
Woodland, CA 95695

Subject: Notice of Determination in compliance with Section 21108 or 21152
of the Public Resources Code.

Project Title: PW2022-01 - County Road 96 over Dry Slough Bridge Replacement Project

State Clearinghouse Number: 2022060272

Applicant: Yolo County Department of Community Services
292 W. Beamer St.
Woodland, CA 95695

Owner: Yolo County

Project Location: Portion of County Road (CR) 96 within unincorporated Yolo County, as it crosses over Dry Slough, approximately 0.4 mile north of CR 31 (APNs: 037-010-025, 037-010-028, 037-010-035).

Project Description: The Yolo County Department of Community Services, Public Works Division, will replace the existing bridge on CR 96 over Dry Slough with funding made available through the Federal Highway Administration (FHWA) Highway Bridge Program and administered by the California Department of Transportation (Caltrans). The bridge has been determined to be functionally obsolete by Caltrans as recently as 2013 and has a sufficiency rating of 53.6. County Road 96 is a paved rural local roadway that extends between Russell Boulevard to the south and CR 27 to the north; the project site is located east of the Yolo County Airport. The subject bridge is bordered by agricultural and rural residential parcels, with the nearest residence approximately 100 feet northwest of the bridge.

The existing bridge (Bridge No. 22C0127) was constructed in 1929 and is approximately 44 feet long and 20 feet wide consisting of single-span, reinforced concrete T-girders. The bridge has longitudinal and shear cracking along the girders and evidence of water penetration through the deck. The bridge railing is also in poor condition with spalling and exposed rebar. To improve public safety while traveling on CR 96 as it crosses over Dry Slough, a new bridge will be constructed along the same roadway alignment. The new structure will accommodate two 11-foot travel lanes with two-foot shoulders. The new bridge will be a single-span, cast-in-place, post-tensioned slab structure approximately 60 feet long. The roadway and bridge profile will be raised slightly to clear the 100-year storm event to ensure no increases in water surface elevation in the vicinity of the bridge.

An Initial Study/Mitigated Negative Declaration (SCH #2022060272) was prepared for the proposed County Road 96 over Dry Slough Bridge Replacement Project. This is to advise that the Yolo County Board of Supervisors has adopted the Mitigated Negative Declaration for the above-described project on November 22, 2022, and has made the following determinations:

1. The project will not cause a new significant effect on the environment or substantially increase the severity of a previously identified significant environmental effect.
2. A Mitigated Negative Declaration (SCH #2022060272) was prepared for this project pursuant to the provisions of CEQA and adopted by the County.
3. Mitigation measures were made a condition of the approval of the project.
4. A statement of Overriding Considerations was not adopted for this project.

This is to certify that the Mitigated Negative Declaration and record of project approval is available to the General Public for review at the Yolo County Community Services Department located at 292 W Beamer Street, Woodland, California.
