

2023 Yolo County Multi-Jurisdictional Hazard Mitigation Plan Update: Stakeholders, Planning Committee, and Steering Committee

The 2023 Yolo County Multi-Jurisdictional Hazard Mitigation Plan (HMP) Update involves several layers of partners and stakeholders. Each of these groups, play key functions in the update process and involves a robust committee of subject matter experts, representing a cross-section of views and interests within Yolo County, Unincorporated areas, and the Yocha Dehe Wintun Nation. Through this inclusion of diverse interests, we seek to enhance the robustness of the planning effort, to continue to build support and awareness of hazard mitigation activities, and create a safer community for the residents of Yolo County.

Stakeholders

Planning Committee

Steering Committee

Roles and Expectations

The Stakeholders include the most broad group involved in the 2023 HMP Update process. This includes any individual or organization that informs their jurisdictions and partners on decisions and recommendations of the 2023 HMP Update process.

They are able to provide feedback and comments on any aspect of the 2023 HMP Update but are not intricately involved in the planning process.

In general terms, the planning committee is involved in any aspect of the actual plan update and it's relevant components. These were the partners who submitted Letters of Intent, agreeing to fully participate in the planning process.

The Planning Committee is involved in:

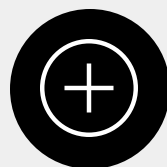

- Updating the Community Profiles
- Updating relevant sections of the 2023 HMP Update Base plan
- Providing feedback, comments, and suggestions to the 2023 HMP Goals and Objectives

The Steering Committee is tasked with guiding the overall plan update process in 2023 and subsequent five year planning update. Final decisions or recommendations for the 2023 HMP Update will be made by the Steering Committee.

The Steering Committee is involved in:

- 2023 HMP Goals and Objectives
- 2023 Hazard profiling
- 2023 Mitigation Project rankings and subsequent project submissions
