INTRODUCTION

HISTORY AND OVERVIEW

The Clarksburg Lighting Assessment District ("District") is responsible for providing street light services for the community of Clarksburg. The District was formed on August 10, 1982 by the Yolo County Board of Supervisors pursuant to the Landscape and Lighting Act of 1972 (Streets & Hwy Code §§ 22500 et seq.) with the adoption of Resolution No. 82-108.

The streetlights are operated and maintained by Pacific Gas and Electric Company (PG&E) and the street light service provided within the District for the benefit of the District's property owners is currently funded from an annual assessment approved on November 23, 2021 following an assessment ballot proceeding, with an annual inflator of the change in the Consumer Price Index (CPI-U) for the San Francisco-Oakland-Hayward, CA area for the most recent February to February as compiled by the Bureau of Labor Statistics, or 5 percent, whichever is lower (Resolution No. 21-152). The rate is then rounded to the nearest whole dollar. The assessment proceeds are exclusively used for providing street light services within the District, including servicing and maintenance, plus incidental expenses. For FY 23-24, the assessment rate was \$37 per parcel. The proposed rate for FY 24-25 is \$38 per parcel.

In accordance with the provisions of the Landscaping and Lighting Act of 1972, this report has been prepared to determine the annual assessments for FY 24-25 required for the costs of operating and maintaining the District's street lights and to determine the special benefits received from the Improvements by property within the District and the method of assessment apportionment to lots and parcels. This Report and the assessments have been made pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "Act") and Article XIII D of the California Constitution.

ENGINEER'S REPORT AND CONTINUATION OF ASSESSMENTS

As required by the Act, this Report includes a diagram or map of the District, an explanation of the benefits received by property from the Improvements within the District, and the method of assessment apportionment to lots and parcels within the District. If the Board of Supervisors preliminarily approves this Engineer's Report and the proposed Assessments by resolution, a public notice will be published in the local newspaper and on the County website. The resolution and public notice will include the date for a public hearing. At the appointed time and place, a public hearing will be held to allow public testimony about the proposed Assessments. At this hearing, the Board will hear public testimony before the close of the public comment period of the public hearing. After the public comment period, the Board may take action to approve the levying of Assessments for Fiscal Year 2024-25. If confirmed and approved, the Assessments would be submitted to the Yolo County Auditor/Controller for inclusion on the property tax rolls for fiscal year 2024-25.

Clarksburg Lighting Assessment District

Engineer's Report, Fiscal Year 2024-25

PLANS AND SPECIFICATIONS

There are 173 parcels within the District. Please see the Clarksburg Lighting Assessment District Map (Attachment A) identifying the 173 District parcels within the District boundary. An Assessment Roll (Attachment B) of the 173 parcels is also attached. The streetlights constructed and maintained with the assessment proceeds are all located within the District boundaries and provide special benefits to the assessed properties with illumination to streets and sidewalks enabling improved access and safety to the District's residents.

Incidental expenses include all of the following:

- The costs of preparation of the annual Engineer's Report;
- The costs of printing, advertising, and the giving of published, posted and mailed notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services in proceedings pursuant to this service;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the Improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Streets and Highways Code Section 22662.5; and
- Costs associated with an election held for the approval of a new or increased assessment (Streets & Highways Code Section 22526).

MAINTENANCE AND IMPROVEMENTS

The streetlights that will be maintained by the District consist of 21 streetlights and all required appurtenances. This includes the cost of power plus maintenance service for streetlight poles, lamps, and glassware. Dedicated funding, often referred to as "reserves" will be used to augment for replacement costs as needed. Reserves are needed in the event improvements need to be replaced due to failure, damage, natural disaster, or other reasons.

FISCAL YEAR 2024-2025 ESTIMATE OF COSTS

The Landscaping and Lighting Act provides that the total costs for providing the maintenance and servicing of the District Improvements and facilities can be recovered in the assessment, including incidental expenses. The latter can include engineering fees, legal fees, printing, mailing, postage, publishing, and all other costs identified with the District's costs of service and annual assessment proceedings. An estimate of District costs for fiscal year 2024-25 for the maintenance and servicing of the Improvements is provided below.

Service	Cost	Notes
PG&E	\$ 3,300	Based on PG&E expenses from last five years.
PG&E Rate Volatility Reserve (10% of PG&E cost)	\$ 330	10% of the above PG&E yearly costs to account for expected yearly rate increases by the utility.
Fund Reserve	\$ 750	To build reserve for future repairs/replacements (\$ 20,000 estimated to be needed for a street light replacement; currently there are not enough reserve funds to cover one street light replacement if it was required.)
Assessment District Administration	\$ 1,531	Annual charge for staff time administering the District, preparing annual engineer's report, anticipated cost to hold future proceedings for annual levies, and unanticipated, miscellaneous administrative activities.
Department of Financial Services	\$ 525	Annual charges for auditing District activities.
Total Annual Revenue Required	\$ 6,436	
Operating Net to be Assessed	\$ 6,436	
Current Annual Assessment Per Parcel (FY 23-24)	\$ 37	173 total District parcels.
Fiscal year 2024-25 proposed assessment	\$ 38	Based on 2023 February CPI of 2.4% (rounded to nearest dollar).

^{*}Fiscal Years is equal to the maximum assessment rate in the first fiscal year the Increased Assessment was levied, adjusted annually by the change in the Consumer Price Index (CPI-U) for the San Francisco-Oakland-Hayward, CA area for the most recent February to February as compiled by the Bureau of Labor Statistics, or 5 percent, whichever is lower. The rate shall be rounded to the nearest dollar.

FUND BALANCE STATUS

The fund balance for this assessment has a five-year average of \$3,420, based on fiscal year 2016-2021. In fiscal year 2021-2022, a successful proceeding was conducted in accordance with Landscape & Lighting District Law of 1972 (Streets & Hwy Code 22501 et seq.) and Proposition 218 (Cal. Const., Article XIII D, Section 4) to increase the assessment

from \$22 per parcel to \$35 per parcel and allow flexibility for an annual inflationary adjustment up to five percent. This successful effort included an engineer's report, resolutions to the board, public outreach efforts and a public hearing. The expenses to hold this required Proposition 218 proceeding were significantly higher than previous years of CSA administrative costs, but if the assessment had not been increased, the District was facing insolvency. The current assessment (FY 23-24) assessment is \$37 per parcel.

As reflected in the table below, due to increased expenses in FY 23-24 for operating expenses (primarily an increase in PG&E electric rates) and a lack of fund reserves, the fund balance is negative. In order to help rebuild the fund reserve, adjusting the annual assessment by \$1 is recommended. This increase is consistent with the inflationary adjustment the Board approved as part of the assessment proceeding in 2021, which authorizes an annual adjustment by the change in the Consumer Price Index (CPI-U) for the San Francisco-Oakland-Hayward, CA area for the most recent February to February as compiled by the Bureau of Labor Statistics, or 5 percent, whichever is lower. The CPI increase from February to February was 2.4%. The year-over-year financial summary follows:

Clarksburg CSA Financial Summary (unaudited) May 2024

	2018-19	2019-20	2020-21	2021-22	2022-23	2023-2024

METHOD OF ASSESSMENT APPORTIONMENT

End of Year Fund Balance Available

Pursuant to the Landscaping and Lighting Act of 1972 and Article XIII D of the Constitution of the State of California, all parcels that have special benefit conferred upon them as a result of the maintenance and operation of the street lighting improvements shall be identified and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire cost of the maintenance and operation of the improvements. Only parcels that receive direct special benefit are assessed, and each parcel is assessed in proportion to the estimated benefit received. Proper maintenance of the street lighting specially benefits parcels within the District. The street lighting reduces

Clarksburg Lighting Assessment District Engineer's Report, Fiscal Year 2024-25

property-related crimes (especially vandalism) against properties in the District. The street lighting within the District contribute to a specific enhancement of the property value of each of the parcels. The benefit provided consists of safety for pedestrians, motorists living and owning property in the District during the nighttime hours.

Streetlights are considered an integral part of the entire street, same as curb, gutters, pavement, signage, and striping. They are elements that provide a safe route for motorists and pedestrians. Streetlights are installed to make streets safer. Proper operation maintenance of the system assures that these benefits are ongoing. Streetlights benefit residential and non-residential property.

The system of roadway infrastructure is established to provide access to each parcel in the District. Streetlights provide a safer street environment for owners of the parcels served. If the parcels were not subdivided to individual parcels within the District, there would be no need for providing a system of streets with safety lighting for the owners of the individual parcels. The County has determined that the streetlights are an integral part of the quality of life within the District. Therefore, the installation, operation, and maintenance of streetlights are for the special benefit of the parcels within the District.

Each parcel within the District receives substantially similar special benefits from the improvements regardless of location. Furthermore, the cost of maintaining and operating each light is substantially the same, regardless of the location of the light within the District. Therefore, a fixed assessment was proposed for each parcel regardless of parcel size or zoning. The special benefits to be derived from the Assessments was conferred on property and was not based on a specific property owners' use of the improvements, owner occupancy of the parcel, or the owner's demographic status, and thus the appropriate method of assessment apportionment should be based on an equal per parcel basis with total costs apportioned equally amongst the 173 District parcels.

ASSESSMENT FUNDS MUST BE EXPENDED WITHIN THE ASSESSMENT DISTRICT AREA

The net available Assessment funds, after incidental, administrative, financing, and other costs, shall be expended exclusively for Improvements within the boundaries of the Assessment District and appropriate incidental and administrative costs as defined in the Plans and Specifications section.
