RICK LANDON

AGRICULTURAL COMMISSIONER SEALER OF WEIGHTS AND MEASURES

A.G. Kawamura, Secretary
California Department of Food and Agriculture
And
The Honorable Board of Supervisors
County of Yolo

It is my pleasure to submit the 2008 Yolo County Agricultural Crop Report. This annual publication summarizes the acreage, production and valuation of Yolo County's agricultural commodities. These figures denote gross value of production and do not attempt to reflect net farm income.

2008 was another good year for Yolo County Agriculture with a record total gross valuation for all agricultural commodities produced of \$527,330,803. This represents an increase of 16% from the 2007 gross production value of \$453,539,019.

It must, however, be emphasized that these production figures only partially reflect the overall measure of the economic impact agriculture has on our local economy. Field labor, processing, transporting, marketing and other farm-related services significantly multiply the value agriculture has to Yolo County. When the multiplier effect of related industries is considered, agriculture contributes well over one and a half billion dollars to the economy of Yolo County.

Processing Tomatoes remain by far the county's leading commodity increasing 5% to \$105,124,614. The increase was due to an increase in price and yield, as acreage actually decreased. A 34% increase in price, plus increases in acreage and yield resulted in a 41% increase in the value of Alfalfa Hay to a value of \$73,405,515. An increase in price caused Rice to move up to the number three spot with a value of \$57,819,601. Wine Grapes dropped to the number four spot with a value of \$42,005,589. Seed Crops continued in the number five spot with a value of \$35,184,445.

Almonds remained in sixth position with a value of \$24,074,400. Organic Production was up almost 12% to \$21,742,344. Wheat was up 78% to \$21,718,263 due to significant increases in acreage, price and yield. Walnuts dropped to ninth with a value of \$16,220,530. Cattle and Calves rounded out the top ten at \$13,679,300.

Recognition for the compilation of this report goes to Jenni King, Julia Nocita and all the staff that assisted in gathering the information. I would also like to thank the agricultural industry and others whose cooperation and assistance contributed in completing this report.

Respectfully submitted,

Rick Landon

Agricultural Commissioner

YOLO COUNTY AGRICULTURE DEPARTMENT

MISSION

The Yolo County Department of Agriculture and Weights & Measures is directly involved with the public, business community and agricultural industries. Our mission is to: assure compliance with federal, state and local pesticide use laws by consistent and predictable monitoring; assist with the worldwide movement of farm products while aiming to avoid the spread of serious agricultural pests; promote the safety of growers and their farm workers, and protect our community and its environment. We support business and consumers by ensuring equity and fostering confidence in the marketplace through regular inspection of raw and packaged commodities and weighing and measuring devices.

ORGANIC FARMING

Number of Registered Farms

76 (Includes fruit, nut, field, vegetable and nursery crops)

YOLO COUNTY CERTIFIED FARMERS' MARKETS

The certified farmers market concept is an effort to re-establish the traditional link between farmers and consumers. Certified farmers' markets are locations approved by the agricultural commissioner where certified farmers offer for sale only those agricultural products they grow themselves. There are three certified farmers markets in Yolo County.

Capay Valley Farm Stand

25020 State Highway 16, Capay May through October Saturdays 12:00 pm-6:00 pm Sundays 11:00 am-5:00 pm

YOLO COUNTY COMMUNITY SUPPORTED AGRICULTURE

Community Supported Agriculture consists of members or "share-holders" of a farm or garden who cover the anticipated costs of the farm operation and farmer's salary. The consumer joins a CSA program and purchases, in advance, a share of the farm's crop, and in exchange is provided a part of the crop each week, delivered to a predetermined pick-up spot, usually near the customer's home or work-site.

Farm Fresh to You

Founded in 1976 by pioneer organic farmer, Kathleen Barsotti, the farm, Capay Fruits & Vegetables, is now owned and managed by her four sons. They grow a wide variety of organic fruits, vegetables, and flowers and serve over 4,000 CSA members.

23808 State Highway 16, Capay, CA 95607 (800) 796-6009

www.farmfreshtoyou.com

Full Belly Farm

Full Belly is a 200-acre, highly diversified organic farm in Capay Valley founded in 1985 by Paul Muller and Dru Rivers. Today there are two more partners, Judith Redmond and Andrew Braite.

P.O. Box 251, Guinda, CA 95637

(530) 796-2214

www.fullbellyfarm.com

Good Humus Produce

Owners Jeff & Annie Main settled in the Capay Valley in the 1970s and over the years created a small, diversified, organic family farm.

12255 Rd 84A, Capay, CA 95607

(530) 787-3187

TOMATO FUN FACTS

You already know that processing tomatoes have been the #1 crop in Yolo County since 1960, but did you also know...

- Among all vegetables except potatoes, tomatoes contribute the greatest amount of nutrients to the American diet
- the popular tomato is the fruit of choice for 85 percent of the 30 million of us who are home gardeners
- Aside from the potato, tomatoes are America's most important commercial vegetable, both in yearly weight consumed and annual yield
- Florida may have the largest fresh tomato industry, but California is clearly number one nationally in processed tomato production, growing nine out of every 10 tomatoes processed in the U.S., with a crop value exceeding \$547 million
- California's prolific canners process more tomatoes in a few days than Ohio, the second largest producing state, processes during the entire season
- Each man, woman and child in America consumes almost 80 pounds of tomatoes every year
- A virtual tomato seed smorgasbord, the Tomato Genetics Stock Center at the University of California, Davis has more than 2,750 genetic varieties of tomatoes
- California's tomato season is in its peak from July through September when harvesters run 24 hours a day. The season, however, actually runs a full six months, beginning in June and running all the way through November

Information from the California Tomato Growers Association website For more information and recipes, please visit www.ctga.org

This crop report and every crop report from 1937 on are available on the Yolo County Agriculture Department's website.

ALONG WITH THE CROP REPORT ARCHIVES, THERE IS A LOT OF OTHER USEFUL INFORMATION. THERE IS INFORMATION ABOUT WHAT OUR DEPARTMENT DOES, ELECTRONIC FORMS AND HANDOUTS, AND LINKS TO OTHER AGRICULTURE RELATED WEBSITES. THERE ARE ALSO LINKS TO SIGN UP FOR UPDATES TO SOME OF THE PAGES ON OUR WEBSITE.
